Adolescent social networks Friendship cliques social

The friendship patterns evident in adolescents' social networks have important implications for adolescent behavior, including problem behaviors such as drug use, delinquency, and sexual behavior. Through friendships, adolescents learn about what others are doing, anticipate accepted and expected behaviors, figure out how to present themselves, and find partners for trying out new behaviors

Adolescent Social Networks School Demographic and

Clique membership was the modal social position pattern, but liaisons and isolates also were well represented. The proportions of adolescents representing each social position varied across schools. In all samples, cliques were homogeneous in gender, race, and mother's educational level, and cliques were largely stable over a one-year time period. The possibility that social network

Gender Differences in Social Relationships Social

The implications for social control, social networks and gender perspectives are discussed. Although numerous studies have examined the relationship between family and religion on delinquency, there have not been studies of the relationship between parents, friends, and religion on substance use among adults.
